

A. Pro-Investing Modification of the Certification System
B. Biomass Co-Firing Prospect

MAY 24th, headquarters of “Polityka”, ul. Słupecka 6, Warsaw

DUO-DEBATE AGENDA

10.00 OPENING OF DEBATE “A”

**10.05 – 12.00 AMENDMENTS TO THE ENERGY CERTIFICATION SYSTEM
(green, yellow, red certificates)**

- How much longer will the works on the RES Act take?
- The prices of green certificates diverge significantly from the amount of compensatory fees. Why do energy trading companies prefer to pay compensatory fees, which results in lowering the prices of certificates?
- Should the support system for cogeneration, which is the best, technologically and environmentally speaking, method to produce electric power and heat simultaneously, be maintained?
- How should oversupply of green, red and yellow certificates be regulated?

12.00 – 12.20 DISCUSSION WITH PARTICIPANTS

12.20 – 12.40 BREAK

12.40 – OPENING OF DEBATE “B”

12.45 – 14.40 CO-FIRING OF BIOMASS AND COAL

- Should there be a modification of the system supporting co-firing technology which takes into account sustainable development principles?
- How to support the use of Polish biomass? Producers expect the Polish power industry to collect at least 40-50% of biomass.
- Should biomass be certified?
- What are the profitability conditions to produce energy with the use of co-firing?

14.40 – 15.00 DISCUSSION WITH PARTICIPANTS

15.00 END OF DEBATE AND LUNCH
